DETAILED ACTION

Applicant's amendment filed 11/03/2003 has been entered. All pending claims have been carefully reconsidered in view of the arguments set forth in the amendment. Claims 2-8, 10-22 are now pending.

Allowable Subject Matter

Claims 2-8, 10-22 are allowed.

The following is an examiner's statement of reasons for allowance:

An optical transmission system comprising, inter alia, a CW (continuous wave) laser source, a phase modulator, and an intensity modulator are known in the art. Ono et al reference (US 6,097,525) discloses an exemplary optical transmission system comprising a CW laser source, a phase modulator and an intensity modulator. The Ono device utilizes a phase modulator that accepts a binary control signal and outputs a binary phase modulated output signal.

On the other hand, the claimed device of the instant application utilizes a phase modulator that varies the signal in a quadratic manner with respect to time, such that the transmitted signal exhibits binary intensity modulated characteristic (0 or 1 relative power level), while the phase of that transmitted signal exhibits variation that is quadratic with respect to time. None of the prior art of record fairly teaches or suggests such limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2874

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
